Management graduate of Universitas Brawijaya (Entrepreneurship program) who ran a food and beverages business for thesis and kept its records in spreadsheets. That experience grew into an interest in digging through operational, financial, and behavioral data to see where a business loses efficiency, how money moves, and how customers act, then turning the findings into clear visuals and recommendations with SQL, Python, Excel, and Tableau, backed by training at Purwadhika. Interested in working in data analytics, business intelligence, or reporting, combining business understanding with analytical skills.

Education

Universitas Brawijaya - Malang, Indonesia — Aug 2022 - Jun 2026

Bachelor of Management, Entrepreneurship Program, Faculty of Economics and Business, GPA 3.76/4.00

- Entrepreneurship studies built a business perspective from the owner side: how to run a business better, keep operations efficient, understand the root of business problems, and use insights to support decisions. That perspective was tested directly through the Es SiGemoy business, run as the basis of the undergraduate thesis.
- Relevant coursework: Research Method in Business, Financial Management, Operational Management, Marketing Management, Human Resource Management.

Purwadhika Digital School - Tangerang BSD, Indonesia — Aug 2026 - Present

- Currently in project-based training in data analysis, practicing SQL (MySQL), Google BigQuery, Python data cleaning and statistics, Tableau dashboards, and data storytelling.
- Completed 2 of 3 modules so far, scoring 80 on Module Exam 1, 95 on Module Exam 2, and 88 on Capstone 1.

Work Experience

Es SiGemoy - Cianjur, Indonesia — Mar 2025 - Sep 2025

Owner

Es teler and alpukat kocok (avocado shake) business

- Ran an es teler and alpukat kocok business in Cianjur for 7 months through a rented stall and online (B2C), tracking daily sales, costs, and cash flow in Google Sheets, and passed the Business Verification of FEB Universitas Brawijaya (Oct 2025).
- Cut ingredient waste by 60% on no-sales days by using cold storage, a data-driven decision guided by those daily records.
- Generated Rp48.5M revenue and Rp10.1M net profit in 7 months by selling 4,386 cups.

Projects

Blue Bird Taxi: Demand and Fleet Insights | - MySQL, Python, Statistics

- Analyzed peak-hour taxi requests to trace unserved demand despite idle drivers, as a Module 2 capstone with 1 teammate.
- Found a 36.6% request failure rate in the CBD at peak hours (vs. 5.5% off-peak) by analyzing 6 MySQL tables with Python and statistical tests.
- Identified 30.6% of driver shifts with zero trips, and turned the findings into 7 data-driven recommendations, each tied to a KPI.
- View Project

Blue Bird Operations Dashboard | - Tableau

- Designed a 3-page Tableau dashboard (Overview, Fleet, Demand & Revenue) with Month, Service Type, and Pool filters for the COO and pool managers to track trips per shift and revenue.
- Surfaced Pool Bandara Soetta as the lowest-productivity pool (1.02 trips per shift vs. 1.23 fleet average).
- Tracked Rp25.64B revenue from 307.7K trips (Oct-Dec 2023, Rp83.3K average per trip) for COO and pool-manager monitoring.
- View Project

Indonesia Happiness Trends: World Happiness Report | - Python, Statistics

- Benchmarked Indonesia's happiness scores against global and ASEAN averages to provide context.
- Identified freedom to make life choices (r = 0.89) and social support (r = 0.79) as the factors most closely linked to Indonesia's happiness scores (2021-2025) through statistical correlation analysis in Python.
- Ranked Indonesia 5th of 7 ASEAN countries on a 5.24-5.62 score range, benchmarked against the global average.
- View Project

Jabrique: AWMM Business Plan Funding Competition | - Business Plan, Pitch Deck, Canva

- Led a team of 4 in Malang to build the business plan for Jabrique, an upcycled corn-cob briquette business for eco-friendly industrial (B2B) buyers, as team lead.
- Presented it in a 14-slide pitch deck covering the problem (5.7M tons of corn-cob waste per year in Indonesia), target market, SWOT, competitor analysis, and cost structure (Rp2.632M total investment).
- Secured Rp4M in approved funding (2024).
- View Project

Organizational Experience

UKM Taekwondo Indonesia Universitas Brawijaya - **Malang, Indonesia** 2023

Inventory Section Staff and Athlete

- Coded 190 items across 3 locations (100 previously uncoded) in a spreadsheet database, continuing the prior cohort's records.
- Flagged 96 defective or broken items out of 183 assessed in monthly counts.

Skills and Achievements

- **Hard skills:** Data Wrangling, Data Cleaning, Exploratory Data Analysis, Statistics, Data Visualization, Data Storytelling, Data-Driven Decision Making, SQL (MySQL), Google BigQuery, Python (pandas, NumPy, SciPy, statsmodels, Matplotlib), Tableau, Microsoft Excel, Google Sheets, Microsoft PowerPoint, Canva, Jupyter Notebook, Google Colab, GitHub, Claude Code.
- **Soft skills:** Analytical Thinking, Problem-Solving, Business Understanding, Data Storytelling and Presentation, Stakeholder Communication, Attention to Detail, Collaboration and Teamwork.
- **Languages:** Indonesian (full professional proficiency; native language); English (full professional proficiency; lived in Saudi Arabia since elementary school and attended an international school).
